MACtac® Performance Graphics

MACTAC OVERLAMINATES

PERMACOLOR® Digital PS Overlamines

LF6500 Series is a family of clear pressure sensitive adhesive coated films that are available in a variety of surface finishes. These films are specifically designed to be laminated to digital images (ink jet, electrostatic and thermal) and will also work well on photographic prints and transparencies. The LF6500 products protect the images from abrasion, moisture, UV light and other potentially damaging climates. The products can be used for indoor or outdoor applications. All LF6500 products have a white paper liner that is removed prior to lamination.

Location: Alpha Romeo Display
Material: Digital PS Overlamines

Tips:

Cleaning instructions for clear PS overlaminates:

- 1) Use a clean, soft, lint-free cloth.
- 2) Use standard glass cleaner (Windex™, Glass Plus™, etc.)
- 3) Spray the cleaner onto the cloth, NOT onto the image. Do not over saturate the cloth.
- 4) Wipe down the image with the wet cloth.
- 5) Dry with a clean, soft, dry cloth.
- 6) If the edges of the image are not sealed, take care not to introduce cleaner to the adhesive. Over time, edge lifting will occur (MACTac recommends you always seal the edges of a graphic during the finishing process).
