Coroplast is an extruded, twin-wall plastic sheet based on a high-impact polypropylene copolymer. This high quality, polypropylene profile sheet is formulated specifically for screen printing, displays and packaging. It uses a copolymer resin to increase impact and low temperature performance while retaining flexibility.

At regular temperatures most oils, solvents and water have no effect on Coroplast, allowing it to perform under adverse weather conditions or when exposed to harsh chemicals.

SINTRA® FOAMED PVC BOARD

FLAME RETARDANT BOARD is a rigid and strong light-weight foamed P.V.C. board which meets fire code regulations. Sold in 4' x 8' sheets. Colours: Red, Blue, Green, Yellow, Light Grey, Grey, Beige, Black. Sintra material is closed-cell, expanded plastic, high-density polyvinylchloride sheet. Sintra is a homogeneous material that allows the ease of cutting without regard for grain. At half the weight of solid PVC, Sintra may be stapled, nailed, rivetted, glued, and thermoformed. Forming may be done on conventional forming machines. Because this material is not hydroscopic, it needs no drying pre-forming.
