305 yellow mesh only	56.40	68.00	99.75

MONOFILAMENT POLYESTER MESH

MONOFILAMENT POLYESTER fabrics are considered the best all-round material for screen printing. Next to stainless steel, it is the most dimensionally stable fabric. The inherent stability and strength of Monofilament Polyester make it ideal for both fine detail, close registration printing as well as general printing.

For adherence of indirect stencils the fabric surface should be treated with an abrasive grit such as ULANO #2 MICROGRIT or ULANO GEL 23.

SEFAR E-MESH

Monofilament Polyester Screen Fabric for general screen printing and textile screen printing.
