230	48.85		63.00	73.45

- Finished screens with your image ready to print
- Re-stretch your old screens, or . . .
- Re-stretch, coat, and shoot your old screens

## MONOFILAMENT POLYESTER

MONOFILAMENT POLYESTER fabrics are considered the best all-round material for screen printing. Next to stainless steel, it is the most dimensionally stable fabric. The inherent stability and strength of Monofilament Polyester make it ideal for both fine detail, close registration printing as well as general printing.

For adherence of indirect stencils the fabric surface should be treated with an abrasive grit such as ULANO #2 MICROGRIT or ULANO GEL 23.

MESH COUNT PER INCH	IN MICRONS	PRICE PER YARD
