# Hand Cut Stencil Film

**WATER SOLUBLE TYPE**

**autotype**

**ULANO® CUT GREEN** is a hand-cut screen process film which can be adhered with plain water. No adhering solvents are necessary. Adhesion is excellent to all fabrics. The backing sheet is a high-transparency 3-mil polyester, affording smooth cutting and superior stick-back for corrections. A special adhesive layer provides easy peeling and removal of the backing sheet after drying. The emulsion layer is formulated to retain edge sharpness and to resist bleeding. Compatible with all inks, except those containing water.

## AUTOCUT AMBER WATER SOLUBLE KNIFE-CUT FILM

A tough, easy to use, water-adhering hand cut stencil film that resists all non-waterbased screen inks and solvents. AUTOCUT has a synthetic emulsion coated onto a .003" clear polyester base. It has a matte surface which accepts pencil guidelines and offers easy cutting and peeling.

SIZE	PRICE
44" X 300"	190.00

SIZE	PRICE
41" X 394"	229.00
48" X 394"	285.00

## ULANO® CUT GREEN WATER SOLUBLE FILM

New Simplified Adhering Technique

**STEP 1 - PREPARATION**

This technique requires a clean, well stretched screen. Using a clean sponge, thoroughly wet both sides of the fabric with water.

**STEP 2 - ADHERING**

Place the emulsion side of the cut stencil against the bottom of the wet screen. Using light pressure, move the wet sponge over the entire surface of the plastic backing to adhere the film to the fabric.

**STEP 3 - DRYING**

With the frame flat, blot the film from the squeegee side with newsprint. Peel off the backing sheet when the film is dry. The adhesive will remain on the backing sheet. A cold air fan may be used to speed drying.

**autotype**

## MASKING FILMS - Ruby 3 AUTOTYPE

Ruby and Amber masking films from Autotype have been developed especially for screen printing applications. Leave it to the industry leader in the manufacture of stencil products to bring you a masking film this good.

ROLLS
