Top Sheet Cutter (TS-1)

Smartly engineered, an innovative tool that offers a unique way to cut only a single, top sheet of material.

- Auto Pressure Control System adjusts the cutting pressure to help prevent damage to the material beneath.
- Easy sheet thickness adjustment - simply set from "MIN" for cutting a thin sheet, to "MAX" for cutting a thicker sheet of material.
- No user pressure adjustment necessary during the cut.
- Cuts sheets up to 0.004" (0.1mm) thick.

Cuts newsprint, paper, cardstock, thin films and plastic sheeting, and tape.

USAGE TIPS:

- Hold the TS-1 as you would hold a pen and cut with just enough pressure to remove any space between cutting material and the base of the TS-1.
- Trial cut is recommended while adjusting the cutting pressure.
- Place an underlay to avoid the possibility of damage to the material beneath until trial cuts demonstrate no damage to underlay.
- For surfaces requiring extra protection, usage of an underlay at all times is recommended.

Blade Replacement

1 Make sure blade is retracted.

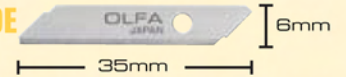

2 Pull out blade storage case.

3 Slide blade and blade-slide out of open side of handle to remove blade. Then exchange blades.

SPARE BLADE
TSB-1

THE "TS-1" takes the dedicated blade "TSB-1" only.
