### K88025 Ultimate Hi Gloss Black Roof Wrap 60" width

[click for photos, specs, data,applic.](#)

Ultimate Black is a high gloss self-healing black vinyl which is ideal for accents during wrapping. It installs like a PPF product using a wet application method because there is no air egress liner. The material can stretch slightly, but is not designed to wrap an entire vehicle. It is perfect for roofs, small accents and especially chrome deletes. The special coating allows it to have an unrivalled high gloss finish that will self heal from small scratches and maintain it's true black look for years.

## SMF 3 MIL CALENDERED TRANSPARENT FILM

These Transparent coloured vinyls are designed for backlit signage, window graphics and colour change overlaminating use. While not optically clear, they are designed for glass decorations and light boxes. The film is a monomeric calendered vinyl with a gloss finish. They come with a liner that offers superior cuttability with conventional die-cutting and computer sign making systems.

3 to 5 yr. outdoor durability based on normal exterior conditions.

**5700** is a flexible reflective film (Engineering Grade) providing wide-angle reflectivity of incident light and giving excellent night and day visibility. The face is made with a layer of microscopic glass beads of a high optical quality. These are embedded into a colored film, which then act as a lens. A metallized back provides the mirrored surface for reflection. The film is coated with a **white, high strength, permanent, acrylic adhesive**. A 92# white polycoated paper liner offers stability and excellent layflat qualities.

**Outdoor Durability - up to 3 years**

Our VinylEfx® Outdoor Durable Series, which provides up to three years of outdoor life, is comprised of a variety of cost-effective simulated metal, light-diffracting and 3-D patterns, designed for long-term outdoor signage. For demanding applications such as truck and boat graphics, the VinylEfx® Durable Series films provide a superior alternative to the expensive simulated gold-leaf films.

RTape VinylEfx® is exceptionally suited for general purpose signage applications and a cut above other “special effects” films thanks to a proprietary deep-embossing technology that provides a crisper three-dimensional appearance to each pattern. **Because the VinylEfx® is vinyl, not polyester, they require no top coating prior to printing!** They print, cut, weed and handle just like intermediate vinyl.

A medium- tack paper application tape, R Tape 4050 allows easier release of larger graphics and those with high gloss levels, and is also suitable for lifting printed graphics without the risk of damaging the print. Works well in wet applications. Economically priced. Has the same features of the Conform series but without the RLA Conform release liner adhesion additive

## AT-60 CLEAR

*Clear Application Tape 100 yd. roll*

AT-60 Clear Choice is an economical, ultra-clear application film which is priced as an alternative to standard grade application paper. AT-60 Clear Choice features a slightly tackier adhesive, which facilitates the transferring of problematic vinyl films. The new adhesive system is very forgiving. If adhesive touches adhesive, the Clear Choice film pulls apart easily, with no adhesive delamination.

# APPLICATION FLUIDS- ADHESIVE REMOVERS

## RAPID TAC OR RAPID TAC II

For "wet" applications • Rapid Tac II for other than Premium Vinyls.

1. Thoroughly clean panels with Rapid Tac and kitchen paper towel. Do not use other cleaners or solvents nor cloth towels or commercial paper towels.

2. Spray panels again with Rapid Tac. Peel backing off decal and place on wet panel. You may also spray adhesive side of decal (See fig. 2)

3. Align decal. Use the squeegee to remove fluid, using a good deal of pressure and working from the center out toward the edges in all directions. (See fig. 3)

4. Wait 2-3 minutes. If decal has cover tape saturate it with Rapid Tac, then remove the tape. Wipe with paper towel and your application is complete. (See fig. 4)

RAPID TAC APPLICATION FLUID is a "super-wet" liquid which cleans the substrate surface and makes the application of even the largest of pressure sensitive markings simple, allowing the correct positioning before final placement.

32oz. with sprayer - 18.40  
128 oz. (gallon) without sprayer - 51.20

### RAPID TAC APPLICATION FLUID II

RAPID TAC APPLICATION FLUID II - has the same benefits as RAPID TAC, but also allows wet application of polyesters, reflectives, and metallized films. Improves bonding on economy type vinyls

32 oz. with sprayer - 24.55  
128 oz. w/o sprayer - 68.95

### RAPID TAC ADHESIVE REMOVER

RAPID TAC WATER SOLUBLE ADHESIVE REMOVER removes glue left on surface after removing decals or film. Works on painted surfaces, some plastics and other surfaces. Not recommended for anodized finishes.

32 oz. with sprayer - 42.60  
128oz (gal.)w/o sprayer-113.00

Remove most adhesives in 30 to 60 seconds!  
Scoop off adhesive in 60 seconds like shovelling snow!

### RAPID PREP

RAPID Prep is a water-based nonflammable wash solvent for preparing surfaces for painting. Totally removes silicone, wax, grease, and oil safely. Especially useful on plastic auto parts.

32 oz. with sprayer - 19.80  
128 oz. w/o sprayer - 53.00

### RAPID CLEAR

Cleans and polishes any transparent material eg. glass, Lexan, Plexiglass, most Polycarbonates, and leaves a professional lustre.

Also does an excellent job on non transparent surfaces.  
Use as a final cleaning for sign work.  
32 oz. w/sprayer - 15.25  
128 oz. w/o sprayer 41.00

## RAPID REMOVER

Adhesive remover, works in 60 seconds.

1. Remove decal with heat lamp or heat gun.

2. Now spray glue residue with Rapid Remover and let it penetrate for 30-60 seconds.

3. Using squeegee, scrape to remove glue residue.

4. Now spray Rapid Remover on rag or paper towel and wipe area clean.  
5. Thoroughly rinse area with Rapid Tac or Rapid Tac II

### RECOMMENDATION:

DO NOT clean any substrate with glass cleaners, paint solvents, (prep-sol, pre-cleto, etc.). Just clean substrate with: Rapid Tac Application Fluid, Rapid Tac II Application Fluid, or for stubborn jobs like silicone, wax, grease or oil, clean with Rapid Prep. All 3 products were built to clean leaving no contaminating residue.

DO USE kitchen type paper towels and Rapid Tac products to clean prior to application of vinyl or films ONLY!

**COROPLAST®**

Coroplast is an extruded, twin-wall plastic sheet based on a high-impact polypropylene copolymer. This high quality, polypropylene profile sheet is formulated specifically for screen printing, displays and packaging. It uses a copolymer resin to increase impact and low temperature performance while retaining flexibility.

At regular temperatures most oils, solvents, and water have no effect on Coroplast, allowing it to perform under adverse weather conditions or when exposed to harsh chemicals.

# CHROMATIC Bulletin Colours

Bulletin Paint

**BULLETIN COLOURS** are ideal for use on signs and billboards where a full gloss finish is desired. Single coat coverage, fast dry, fast cut in, extreme high gloss and pure colour clarity produce a dazzling finished product. They are formulated as a solvent based enamel for superior durability, workability and easy application on large areas and/or rough surfaces such as billboards or masonry walls. The Bulletin Colours may be brushed, rolled or sprayed to a smooth, glass-like finish.

# Blockouts and Primers

## Block Out White

**PBOW602 BLOCK OUT WHITE (4420602)** is a high viscosity block out white. Higher in pigmentation than PBOW Block Out White, this material is chosen when virtually complete coverage over a previously painted sign is desired. This is particularly important when topcoating with the more transparent colours and colour mixes. Solvent based.

4420602	Blockout White	99.90/ Gallon
---------	----------------	---------------

## CHROMATIC PRIMER/METAL & WOOD WHITE

**METAL and Wood Primer White** - is a fast drying high opacity primer with good adhesive qualities on both wood and steel. A coarser pigment particle offers the system greater "tooth" than PBOW Block Out White. Metal and Wood primer sands easily. It is also good for use as a primer-burnish ing sealer under gold sizes and may be slightly tinted. Solvent based.

Product No. 4403101 - Gallon - 95.50

## CHROMATIC "TI-COTE" VINYL PRIMER

**TI-COTE CLEAR PRIMER BARRIER COAT (4331010-GLOSS)**, is a high performance water based clear primer/barrier coating developed for use on vinyl substrates such as flexible faces, awnings, banners and self adhesive vinyls, to allow the use of enamel topcoats and lettering enamels.

## 6000 REGULAR REDUCER 6001 LOW TEMPERATURE REDUCER 6002 HIGH TEMPERATURE REDUCER

Formulated to improve flow at normal temperature conditions by reducing viscosity without significantly altering the quality of the coating being reduced. The Low Temp Reducer is formulated to improve flow and levelling at low temperatures by reducing the viscosity and accelerating the evaporation rate without significantly altering the quality of the coating being reduced. May also be used as a thinner for spray applications. The High Temp Reducer is formulated to improve the flow and levelling at high temperatures by reducing the viscosity and slowing down the evaporation rate without significantly altering the quality of the coating being reduced. The reducers may be used with Lettering Enamels, Bulletin Colours, Art and Sign Poster Colours, Pearlescent Enamels or Fluorescent Colours.

#6000	Regular Reducer - Flow Enhanser	47.70/qt.
#6001	Low Temperature Reducer	37.35/qt.
#6002	High Temperature Reducer	35.30/qt.

**HARDENER (4007)** is designed to accelerate drying time for Lettering Enamels, Bulletin Colours and Pearlescent Enamels. The Hardener will extend colour life, increase gloss, and improve adhesion to most substrates. Adding Hardener to the paint will aid in preventing "lifting" when overcoating with "UCO" Urethane Clear Overcoat, Speed Dry UV Acrylic Clear or an automotive "style" clearcoat. Add up to 10% in volume into 1Shot or Chromatic paint. Recommended shelf life is 14 days after tin is opened.

### Brush Cleaning and Care

Always clean out a brush thoroughly after use. The general rule for cleaning: the solvent or thinner that goes with the paint being used, becomes the cleaning agent. If the paint or medium you are using is compatible with mineral spirits, it is suggested using this as a cleaning agent.

When brush is cleaned, carefully wipe the hair without pulling. Storing the brush greased with light oil prevents any residual paint from drying on the brush.

Do not allow cleaning agent to get into the glued part of the brush, some cleaning agents can attack the glue and cause the hair to loosen.

## PINSTRIPING BRUSHES

### Kafka Signature Series Scrollers series 1660

All Kafka signature series pinstriping brushes can turn corners without “flare-out” and without the user “rolling the brush”— just lift and work the tip for designs that usually take years to master. Works equally well with urethanes and oil-based enamels

**Size 0 — 20.75 ea.** The size 0 brush is the smallest available. It’s capable of turning very tight corners and very fine design work while still maintaining great line consistency due to the nature of design and combination of synthetic and natural hair.

**Size 1 — 20.75 ea.** The size 1 is slightly larger than the 0 and will perform the same as the 0 with a slightly heavier line. As with all the Kafka brushes, they perform with oil-based enamels as well as urethane striping paint.

**Size 3 — 20.75 ea.** The size 3 will work in a wide variety of applications from scroll striping to shorter, long-line designs. This brush will give the user greater control in all applications and flatten the learning curve for novice strippers. The size 3 is also the most used favorite of its designer, Steve Kafka.

**Size 5 — 21.25 ea.** The size 5, which is slightly larger than the size 3, holds more paint and will accomplish heavier designs with ease. Depending on pressure, the line thickness can reach 1/4” and fine lines to 1/16” in the other direction. This brush is a favorite for outlining larger flame layouts, cars, trucks, and semi trucks.

**Size 6 — 21.25 ea.** The size 6 will give you the heavier lines needed in many instances, but still can deliver delicate design work. It’s used for initial layouts followed by smaller sizes for more delicate additions in beautiful combinations.

### Kafka Signature Series Longliners

This series of longliner brushes was designed to run consistent, long lines with greater line quality and control. The handles were left long so they may be trimmed to fit inside the web of your hand, or to use as they are. The longliner series has received incredible accolades from all of the top long-line pinstripers

**Size 5/0 — 23.50 ea.** The 5/0 is the finest longliner brush available. It will lay pin lines for incredible distances with ease and beautiful line quality. It soon will become the standard for the fine line strippers everywhere.

**Size 3/0 — 23.50 ea.** The 3/0 will match any brush currently available for fine line work, but surpasses them all for durability, line quality, and control.

**Size 00 — 23.50 ea.** The 00 is probably favored for lines on most cars. Other brands of brushes include the size 00, but when you use our other sizes the reason for us making a variety becomes clear.

**Size 0 — 24.50 ea.** The size 0 brush performs all longliner functions as the size 1, just not as heavy. Synthetic and natural hairs are used for long life, line consistency, and control.

**Size 1 — 24.95 ea.** Size 1, the largest brush of this series, holds lots of paint and will do over a 1/4” (6.4 mm) line with ease. It will also do fine lines with less pressure perfectly

### Kafka Design Series Short Stroke Brush

we have a shorter version of our number one seller, the #3 signature series scrolling brush. This will help the new pinstriper navigate intricate loops and scroll designs easily and flame outlines will be achieved with greater ease.

It has a gold plated ferrule, a dark stained natural wood handle, and the most successful hair combination. **One size only. - 22.50 ea.**

## Angular Fitch Liner

**SERIES 4090**

• **Finest 100% White Hog Bristle** • **Seamless Nickel Ferrules** • **Long Blue Varnished Handle**

This angular fitch is good for awning work. Sign painters also find it easier to use an angular brush when working on a wall or upright surface. It is good for outdoor work (awnings, walls, bulletins and rough surfaces). This brush is not chiseled. There is no advantage to chisel an angular liner, since most sign painters want an even down stroke.

## LETTERING BRUSHES – MACK

### Mack Wizard Scribe Synthetic Sable Lettering Brush

You will notice that the hair length is longer than a traditional quill which gives the brush a precision snap without losing that coveted feel. This brush carries the paint well and delivers the paint effectively.

**Let's see what Steve "Wizard" Chaszeyka has to say about the brush.**

*"This new synthetic lettering quill is full of surprises. Snappy and controllable, this brush gives me the moves I like to lay out script, casual and more disciplined letter styles as well. Carries a lot of paint, and delivers on point. Tight and efficient, no wasted moves."*

**With the exorbitant price of pure red sable today the Wizard synthetic brush is an excellent alternative at a fraction of the cost.**

## MACK FOXY TAILS BRUSH SET OF 6

### FOXY TAILS (M/T)

The latest brush set to join the Tidwell family is here!

This set consists of **SIX** new brushes:

**Sneaky** – Medium, round, pointed brush

**Sly Filly** – Small, flat, long filbert brush

**Crafty** – Medium, flat, long filbert brush

**Tricky** – Large, round, pointed brush

**Slick** – Extra long, round, pointed brush

**Bushy** – Large, flat, extra long filbert brush

4 out of the 6 are pretty unique. The shape, hair configuration, hair lengths, and types of hairs were tweaked to create some really cool brushes. We butchered a lot of art and lettering style brushes and tested a variety of synthetic hair combinations in order to get these exactly the way we wanted them.

Two of them are pretty traditional round, pointed brushes... but even those have unique lengths and sizes. Again, just a little Tidwell tweak on the standard round brush.

Tidwell's Foxy Tail brush set with selected synthetic hair and orange lacquered handles.

*Comfortable to hold, easy to care for and robust. Suitable for all acrylic paints, enamels and urethane paints.*  
Set of 6 – 47.95

## MACK M/T 3 PIECE BRUSH SET

### Tidwell Brushes – M/T 3 Piece Set

The new 3 piece paint brush set Size is - Five Speed: Which is a larger version of the "SLIM" from the original set. The five speed is basically a #5 script / scroll brush as the slim was basically a #3 or so.

Heavy:

Which is a larger version of the "LIL BIT MORE" ... it's a little longer and fatter so it has a ton of uses... seriously.

One-Liner:

This is a completely new brush... it is Amazing for outlining, details, med. to long lines within an illustration.

**Price – 21.75 per set of 3**

## MACK M/T 6 PIECE BRUSH SET

### Tidwell Brushes – M/T 6 Piece Set

These brushes work great with enamels, acrylics, oils, and I'm sure they will work with just about any other medium.

*You have the Mini, Lil'Bit, Slim, Skinny, Lil'Bit More, and Flat Top. The handles are a little fatter in the belly (where you grab 'em), so they have a little more room for normal-sized hands (see the picture for a good idea). The bristles vary depending on the brush size and configuration. The smaller brushes are made of a softer, fine quality synthetic. The large flat and the long outliner are made with golden synthetic.*

They blend paint really well without the brush strokes of stiffer bristles. They also work for lines, shading, and for sharp detail. The brushes really speak for themselves.

I know there is no perfect brush or brush set for everyone, but I seriously doubt you'll find a more useful brush set at this price.

**Bronze Powders**

The addition of a small amount of solvent (correct for the vehicle being used) to the bronze powder will aid in making a smooth mixture and increase the brilliance of the finished job.

Many printers add the bronze powder to the desired vehicle until a heavy paste results. The paste is then thinned to screening consistency with the correct solvent.

Use the proper clear base (bronzing vehicle) and thinner, depending on the substrate to be printed. Use approximately 2-3 lbs of gold powder to 1 gallon of clear base and 1-1 1/3 lbs. of Aluminum powder to 1 gallon of clear base. For best results use a monofilament screen fabric of 180 mesh to 230 mesh.

## Product Information

An opaque scratch-off ink designed for overprinting on printing images. Suitable for lottery tickets, sweepstakes, games, direct mail coupons etc. Prints can be removed easily with fingernail or coin and does not powder.

## Application Information

**Thinning :** May be used straight from the can or thin to required viscosity with SCO-1800 Thinner. Over thinning will reduce opacity.

**Additives :** SCO-0030, Release Varnish may be used to coat certain stocks prior to printing if Scratch-off ink does not release properly. If ink releases too easily, add 1 - 5 % of SCO-0070, hardener to ink and retest.

**Wash-Up :** SCO-1800 Thinner  
ITC-1840 Wash-Up

**Coverage :** Approximately 1200 sq.ft./1 U.S. Gallon using a 150/in. monofilament fabric.

**Fabric/Stencil :** 110 to 196 monofilament fabric. It is recommended to use as coarse of a mesh as the detail will allow. Direct and indirect photostencil or water soluble hand cut stencils are suitable.

**Drying :** By solvent evaporation . SCO Series air dries in 15 to 40 minutes or can be force-dried in seconds at temperatures of 90 deg. F. to 170 deg. F. Use of excessive heat may cause ink not to scratch off.

**Die Cutting/Creasing :** N/A

## ADE Series Epoxy Screen Ink (2 Part)

Nazdar ADE Series Epoxy Screen Ink

ADE inks are formulated with high-quality epoxy resins for excellent adhesion to a wide range of hard-to-print substrates. ADE provides outstanding solvent, chemical and abrasion resistance. ADE is a two-part ink system and must be initiated with ADE677 catalyst prior to use.

**SUBSTRATES:** Epoxy, melamine, treated polyethylene, polypropylene, metals, glass, PC boards.

**END USES:** Ideal for electronic and industrial applications.

**MESH:** 200-305 monofilament polyester or stainless steel mesh.

**STENCIL:** Direct method photo emulsion or equivalent. Also, any solvent resistant film or photo emulsion.

**INK PREPARATION:** Before using ADE ink, add 1 part ADE677 Catalyst to 5 parts ink. Pot life of catalysed ADE ink is approximately 6-8 hours. ADE678 High Performance Catalyst and ADE679 Snowboard Catalyst - Contact Technical Service for special data sheet.

**AIR DRY:** 30-60 minutes at room temperature.

**FORCE-DRY:** 3-5 minutes at 150°-180°F. Baking ADE prints for 10 minutes at 300°-325°F will produce the hardest, most durable prints.

**EXTENDERS / ADDITIVES:** To extend colour and / or reduce pigmentation, add ADE26 Mixing/Metallic Clear. For printing halftones and fine details, add ADE90 Heavy Body Base. For best printing results, reduce ink with 5-15% (by weight) RE190 Thinner. To prevent drying in screen under hot, humid conditions, add RE182 sparingly.

**CLEAN UP:** SW37 Wash Up.

## DA Series Nylon and Flock Screen Ink & DA Accelerator (2 Part)

Highly opaque and extremely flexible and elastic inks for printing and flocking most synthetic and natural textiles, includes waterproof nylon and other synthetics having a finish. (Pre-testing of waterproof nylon is recommended.) DA Series have virtually unlimited resistance to laundering and dry cleaning as well as ironing.

The DA Accelerator has been formulated to accelerate drying times of DA Series Nylon Inks.

**SUBSTRATES:** Cotton, cotton blends, synthetics, waterproof nylon, and finished synthetics.

**END USES:** Nylon jackets.

**MIXING INSTRUCTIONS:** DA Series is a two-part polymerizing system. All colours must be mixed with DA176 Catalyst in a proportion of 3.5 parts of colour to AT LEAST one part of catalyst BY WEIGHT. Catalyst DA176 is sensitive to moisture changes and should be stored in a cool, dry place. Catalyst should be kept tightly closed at all times. Use one quart of DA ink with a half pint of DA176 Catalyst and add up to 75 drops (1 gram) of DA Accelerator. Stir well.

**FINISH:** Gloss.

**DRYING:** DA Series will in most cases air-dry overnight for subsequent handling depending on ink/catalyst ratio. The ink will continue to cure for three to four days. Full resistance to washing and dry cleaning is effected approximately seven days after printing. Heat-curing at 300-325°F (148-160°C) is required for periods ranging from seven to 10 minutes. Correct use of DA Accelerator will reduce the drying time of DA Series Inks to four minutes at 300°F (149°C).

**STENCILS:** Direct emulsions, photographic stencils or water soluble knife cut film.

**SQUEEGEE:** 60-80 durometer, square-edged blade.

**CLEAN UP:** VF184 Screen Wash.

**OPACITY:** All colours have excellent opacity and may be printed onto black or other dark grounds.

**COVERAGE:** Approximately 500-600 sq. ft./gal., depending upon screen fabric mesh.

**MESH:** 110-200 monofilament mesh is recommended.

# GC PLASTISOL INKS

[Click here for color chart](#)

## PRODUCT FEATURES

- Multi-purpose Plastisol Inks for Direct and Indirect printing.
- Excellent elasticity
- Super Opaque colours
- Low residual odour
- Non-bleeding colours

## PRODUCT DESCRIPTION

GC Plastisol is a soft, creamy ink designed for both direct and transfer printing applications either hot or cold peel. Plastisol has excellent coverage on dark fabrics, yet easily adjusts to a "softhand" finish on light or white fabrics. With the addition of one or two products Plastisol becomes a true Multi-purpose Plastisol. Excellent results can be obtained in direct printing Wet-on-Wet without any build-up colours.

## DRYING

Direct printing on garments 325° F for 1-1/2 minutes transfer printing (cold and hot peel) 220-240°F for 20-60 seconds. (Note: the heat-transfer press provides the full curing). The cure on direct printed garments may be affected by the thickness of the ink deposit, heat fluctuations and the type of dryer. Too much heat may cause the dyes in the garment to migrate (colour bleeding), fabric scorching and shrinkage. A good test to see if the ink is cured is to stretch the cured print; if it stretches like a rubber band, then it has formed a continuous film and is fully cured. If it starts to break apart, then it is under cured. Additional passes through the dryer at the same temperature setting does not work. It is necessary to increase the temperature if the garment reaches 325°F, the Plastisol ink will be well cured.

## TRANSFER APPLICATION

For regular transfers the recommended temperature is 360-375°F for 6 seconds applied under pressure. Let cool for a few seconds and peel. For Hot Split transfers the recommended temperature is 360°F for 6 seconds, applied under pressure. Peel paper immediately.

## SUBSTRATES

Cotton and Poly/cotton blends, most open mesh knits but not materials that have been waterproofed.

## FABRIC/STENCIL

For heavy deposit printing on dark garments use 86-139 Monofilament. For light deposit printing on white or light coloured garments use 157-245 Monofilament. For Hot-split transfer paper use 86-157 Monofilament. The recommended fabrics are to be used as a guideline only and to achieve the best results testing should be done. All stencil systems can be used, but direct photographic emulsions will provide the most durable stencil. Indirect stencils can be used.

## THINNERS

1180-50 Thinner. Plastisol inks may be used straight from the can, but maximum 20% of thinner is recommended. For reducing viscosity when required.

### CAUTION

Too much thinner may increase the curing requirements of ink resulting in fabric scorching, shrinkage, especially on 50-50 Poly/cotton fabric blends.

## ADDITIVES

The 1100 series Plastisol ink may be used straight from the container but a maximum 2% of 1180-50 wetting agent thinner is recommended for reducing viscosity when required. Too much thinner may increase the curing requirement resulting in fabric scorching and shrinkage, especially on 50/50 polyester cotton. Using Mineral Spirits for thinning purposes will cause resin particles to swell, creating changes in viscosity which may cause poor opacity or blurred images. Plastobond - add 10-15% to Plastisol Ink for nylon printing. Powder Transfer adhesive - a bonding agent that promotes adhesion to the garment.

1. Allow 24-96 hours after test printing to evaluate ink for intended application.
2. If product requires overlapping coats, (multi-colors) test ink on substrate with over lapping colors.
3. Refer to MSDS sheet for heavy metal content.

## MONOFILAMENT POLYESTER MESH

MONOFILAMENT POLYESTER fabrics are considered the best all-round material for screen printing. Next to stainless steel, it is the most dimensionally stable fabric. The inherent stability and strength of Monofilament Polyester make it ideal for both fine detail, close registration printing as well as general printing.

For adherence of indirect stencils the fabric surface should be treated with an abrasive grit such as ULANO #2 MICROGRIT or ULANO GEL 23.

## KIWOBOND Frame Adhesives

### KIWOBOND 1000 HMT

A fast drying two-component adhesive for adhering mesh to wood, aluminum, and metal frames. 1000 HMT is the choice for high mesh tension and fast drying requirements. The low viscosity aids the application on very fine mesh counts, ideally above 305 tpi (120 tpcm). Not recommended for mesh counts below 156 tpi (60 tpcm). Technical sheet available.

1000HMT-750 Gram Set (adhesive & hardener)	54.85
1000HMT-4.25 Kilo Set (adhesive & hardener)	249.00
1000HMT-4.25 Kilo Frame Adhesive only	165.00

**KIWOBOND 930 SET**

### KIWOBOND 930

A fast drying two-component adhesive for adhering mesh to wood, aluminum, and metal frames. Its medium viscosity enables easy application even on the coarsest mesh counts. Recommended for mesh counts below 260 tpi (100 tpcm) Technical Sheet available.

**KIWOBOND 930 Set - 52.15**

## AUTOTYPE EXPOSURE CALCULATOR

An all-in-one test positive that helps you determine the best exposure time. The calculator's series of incremental gray neutral filters provides 5 exposure values with just one test exposure. Select one of them for the best stencil thickness, colour/hardness and definition. Features include a 65 line screen ruling and halftone dots in 10, 50 and 90% areas. Also the edge definition/resolution targets have a break in them and very fine type to assist your interpretation. A complete instruction guide is provided with each calculator.

**92.00 ea.**

## SOLVENT RESISTANT Plastic Tape

Durable, white polyethylene reinforced cloth tape is pressure sensitive...has tremendous tack. Perfect for sealing off inside of frames, protecting edges and guides, etc. Molds into all crevices and corners and is simply removed. Tape is 2" wide and comes in 60 yard rolls.

**2" x 60 yd. - 36.65**

## FABRIC PREP

### ULANO GEL 23

**An abrasive degreaser gel that combines the actions of Microgrit No. 2 and Screen Degreaser Liquid No. 3**

The abrading action of Ulanogel 23 promotes better wetting of the fabric and adhesion of the stencil, and thus, longer press life. Its degreasing action removes dirt, dust, and oils from the fabric, reducing the risk of stencil failure and pinholing. Ulanogel 23 is ready-to-use and rinses off in hot or cold water. Its thixotropic character permits easy and effective preparation of larger screens held in a vertical position. Non-caustic - will not harm frames, fabric, or adhesives on stretch and glue frames. Recommended for use with all stencil systems on synthetic fabric only.

**Gallon - 62.00**

### UNIVERSAL MESH-PREP

A non toxic fluid for degreasing and dramatically improving the wetting characteristics of all mesh types. Universal Mesh Prep is fast and easy to apply and harmless to the mesh.

Developed for capillary films but suitable for all stencil systems.

**5 Litre (1.32 gal.) Containers 68.00**

### ULANO #3 SCREEN DEGREASER LIQUID

A degreaser solution for all fabrics new or used, before stencil making - and as a degreaser after ink removal to speed the action of the stencil removal. Ready to use. No mixing. Foam action cleaning. Degreases effectively in hard water. Rinses clean with hot or cold water. Non caustic.

**Quart - 16.25  
Gallon - 56.00**

# SCREEN MAKING AIDS

## SCREEN BLOCKOUT

### **MacDermid RUBY BLOCK OUT** Autotype

Outstanding coatability and a high contrast red color are the key features of this premium solvent resistant blockout.

Autotype Ruby Block is a medium viscosity blockout for use on fine and medium mesh. It even coats and fills mesh openings without the drip-through that can lead to pinholes.

**5 Litre - 48.00**

### **65 SCREEN FILLER**

A water-soluble blockout with drying characteristics similar to indirect films to prevent loss of register. Same ink suitability as ULANO Presensitized Fotofilms.

Can be used for touch-ups when thinned with cold water. Can be used in unventilated rooms. Suitable for all ULANO Stencil Systems used with non-aqueous inks.

**1 Gallon - 59.00**

### **Kiwo Red Blockout**

RED BLOCKOUT is our most economical, water soluble, and solvent resistant screen filler used for blocking out screens before printing. RED BLOCK-OUT can be used to cover large areas of the screen and to touch up pinholes. It is VOC free and contains no alcohol nor solvent.

**1 Litre - 20.50  
4 Litre - 43.00**

## SCREEN RECLAIMING

### **KIWO Mega-Clean Active Paste - 1 US Gal**

**KIWO Mega Clean Active : combination solvent and haze remover paste for the removal of most ink stains and emulsion residue in the screen. It has been formulated to be brushed onto the screen and rinsed off with water within a few minutes of application.**

**U.S. GAL. 107.00**

### **#78 HAZE REMOVER PASTE**

A ink haze and stencil residue remover that is effective on most inks and emulsions. Will also etch most mesh surfaces for film adhesion. Follow directions supplied with product to avoid damaging fabric. **1 kilo - 19.95**

### **NO 4 STENCIL REMOVER LIQUID**

Ready-to-use stencil remover liquid for fast action on all types of fabric, including metallized polyester.

Will not etch fabric. Contains no strong alkalis or hypochlorites. Ideal for use in tanks; will not attack fabric adhesives on rigid frames.

**4 litre - 48.00      1 litre - 15.00**

### **PRE-MIXED SUPER PASTE** **PRE-MIXED SUPER PASTE (Scented) - 4 Litre - 145.00**

For cleaning/degreasing all types of meshes.

Super Paste paste will:

- Remove ink and stencil residues thus preventing ghost images, provided these are not due to thread damage by abrasion.
- Degrease and chemically roughen aluminum frames prior to screen stretching.

### **CPS Degreaser Concentrate:**

**1 Litre - 38.00**

CPS Degreaser Concentrate: is a water-based mesh preparation that removes grease and contaminants from the screen prior to stencil application. It is offered in a standard concentration of 1:10/15 formula which is diluted with 10-15 parts of water for a ready to use product.

## Saati SM 1000 Presensitized Photo Film

SM1000 is a red presensitized stencil film especially designed for the printed circuit manufacturer.

While the product need not be limited to this application, its excellent adhesion to coarse polyester fabric, with fine resolution and sharp definition that makes it the ideal choice for this industry.

2 mil backing sheet.      Hybrid gelatin with double the durability of conventional films.

High resolution on polyester mesh.      Adhesion is improved with Saati Direct Prep 3  
SM1000 is the preferred film for printing metal parts and signs.

**Application:** For all Printing Applications.      **Roll size 42"x 300" - 298.00 roll**

A.W.T.'s Rack-It™ heavy-duty drying racks are the perfect choice for industrial drying applications. Built on a welded steel frame, these racks provide a safe and sturdy resting place for your substrates as they dry. Longer lasting than rubber, steel bumpers come standard on all of our heavy-duty racks and are welded to the outside of the shelf for maximum drying room. For smooth up/down operation, the individually adjustable shelf springs give you tension control over each shelf and all shelves feature a rust- and solvent-resistant, powder-coated finish to extend the life of the rack. Also available in heat resistant models for baking applications.

Summary: GF 290 ChalkMark™ vinyl is a 5.0 mil matte black embossed chalkboard vinyl with a clear high-tack removable adhesive on a 90# liner. The 5.0 mil ChalkMark vinyl is designed for use with soft chalks and liquid chalk markers, and has a washable surface. The HTR adhesive works great on smooth painted drywall, plastic a-frame signs, metals and glass. ChalkMark™ is commonly used to produce decorative wall graphics covering large areas for menu boards or murals. GF 290 ChalkMark can also be used to create promotion graphics, plasticade signs, point-of-purchase graphics and craft cut shapes and decals.
