

PRESENSITIZED PHOTO STENCIL FILM

The world's most widely used indirect photo-stencil film.

FIVE STAR provides the screen printer with excellent edge definition and high resolution for a wide range of demanding screen printing applications including halftones and printed circuit board imaging.

The presensitized red gelatin emulsion of FIVE STAR includes a special protective coating to prevent blocking even at high humidity levels.

41" x 394" 364.00 48" x 394" 490.00

Presensitized Film Steps					
					
EXPOSURE to UV light source positive polyester emulsion gauge exposure time for your light source	HARDENING with activator liquid or powder	WASHOUT fine water spray use product direc.	DEGREASING use degreased screen see product direc.	BLOTTING roll with paper on raised surface	DRYING follow directions supplied w/roll

Saati SM 1000 Presensitized Photo Film

SM1000 is a red presensitized stencil film especially designed for the printed circuit manufacturer.

While the product need not be limited to this application, its excellent adhesion to coarse polyester fabric, with fine resolution and sharp definition that makes it the ideal choice for this industry.

2 mil backing sheet. Hybrid gelatin with double the durability of conventional films.

High resolution on polyester mesh. Adhesion is improved with Saati Direct Prep 3
SM1000 is the preferred film for printing metal parts and signs.

Application: For all Printing Applications. **Roll size 42"x 300" - 298.00 roll**
